Partner(s)	<p>At local level - community organizations, village councils, city councils.</p> <p>At rayon level - rayon councils and rayon state administrations.</p> <p>At regional level - regional authorities (regional state administrations and regional councils), Autonomous Republic of Crimea Council of Ministers and regional universities.</p> <p>At national level :</p> <ul style="list-style-type: none"> • Ministry of Economic Development and Trade, Secretariat of Cabinet of Ministers, relevant ministries (Ministry of Regional Development, Construction and Housing, Ministry of Health, Ministry of Agrarian Policy and Food of Ukraine) • Parliamentary Committee on State Building and Local Self-Governance • Foundation for Local Self-Governance of Ukraine under the President of Ukraine • Ukrainian Association of Local and Regional Authorities of Ukraine, Association of Cities of Ukraine, Association of Small Towns of Ukraine, Association of Village and Settlement Councils
Target group(s) ¹	The direct target group will comprise of 900 community organizations, 900 village/city councils, 200 rayon councils/administrations, 25 regional councils/administrations, and 10 regional universities/training institutions
Final beneficiaries ²	Citizens of at least 900 communities, local authorities in 200 rayons , Government of Ukraine
Estimated results	<ul style="list-style-type: none"> • 900 community organizations, 200 Local Development Forums and 25 Regional Coordination Councils created/strengthened to ensure appropriate platform for collective actions and joint decision-making on local level³ • Capacity of 200 community resource centres in community-based development strengthened • Curricula on community led development including the community-based development principles and methodology adopted by at least two regional universities/training institutions • At least 6,000 community members and 2,000 elected/state authorities trained on how to cooperate with community organisations and local authorities • At least 600 community micro-projects implemented to improve

¹ “Target groups” are the groups/entities who will be directly positively affected by the project at the Project Purpose level.

² “Final beneficiaries” are those who will benefit from the project in the long term at the level of the society or sector at large.

³ Number of beneficiaries was estimated on the basis of the following assumptions:

- Increased upper ceiling for the eligible cost for one community micro-project in CBA II (up to 16 000 EURO in comparison to 7 000 EURO in CBA I)
- Increased project’s share in the total cost of the community micro-project in CBA II (up to 70% of the total micro-project cost in comparison to 50% in CBA I)

	<p>the delivery of basic communal services and to support economic development in rural areas.</p> <ul style="list-style-type: none"> • At least 10,000 members of community organizations trained on energy efficiency to ensure increased public awareness at local level on energy saving options • At least 300 community projects on efficient use of energy implemented • Knowledge management hub established
Main activities	<ol style="list-style-type: none"> 1. Launch of CBA Phase II Project 2. Establishment of partnerships at local level 3. Formation/grafting of local support structures: local development forums, regional coordination councils and community resource centres 4. Implementation of community led micro-projects 5. Promotion of energy efficiency through innovative technology and renewable energy sources 6. Promotion of farm and non-farm micro and small business development 7. Establishment of knowledge management hub 8. Building capacities of local stakeholders (community members, civil servants and elected authorities) in community based local development 9. Conducting information campaign and raising public awareness 10. Evaluation of the Project implementation

1.5. Objectives

Overall objective:

To promote sustainable socio-economic development at local level by strengthening participatory governance and encouraging community-based initiatives throughout Ukraine.

Specific objectives:

- (1) To promote community based approach to local governance and sustainable development by:
- strengthening the capacity of local communities, local authorities and universities in applying community led development;
 - integrating participatory mechanisms for local planning and public service delivery into the day-to-day practices of local governments;
 - supporting community-based initiatives for sustainable rehabilitation, management and operation of basic social and communal infrastructure; and
 - promoting small business development in rural areas.
- (2) To enhance energy efficiency at local level by:
- building capacity of local communities and local authorities in energy planning and efficient energy use;
 - supporting innovative community initiatives in efficient energy use; and
 - raising public awareness on energy efficiency based on grassroots level best practices
- (3) To support the creation of the locally owned and managed repository and network of good practices and knowledge on community mobilization and participatory governance by:
- documenting and codifying lessons learnt and institutional arrangements established during the CBA implementation
 - establishing a network of knowledge hubs for the creation, analysis, and sharing of innovative approaches to community based development

- supporting academia and other educational institutions in curriculum and capacity development for promoting community based approaches to local governance and development

Project will support community led activities in the following priority areas:

Health (local health posts network)

Environnement

Water management

Local economic development

Energy efficiency

1.6. Project justification

1.6.1. Context of the proposed project

According to the national census of 2001, the share of population of Ukraine living in villages and small towns of less than 50,000 inhabitants constitutes 45% of the population of Ukraine. Over the past years, however, the Ukrainian Government has not paid much attention to the problems of rural Ukraine. Although Ukraine has managed to reduce the absolute poverty⁴ from 9% in 2005 to 4.5 % in 2009, poverty level in rural areas was more than double compared to large cities. Ukrainian rural areas are experiencing a systemic crisis which manifests itself in a variety of issues, such as:

Growing poverty and unemployment among the rural population

The current level of unemployment in villages and small towns is approximately 27%. Half of the entire rural population use their private gardens and household plots for subsistence. Due to a generally low level of rural development, small plot sizes, lack of financial assets, lack of mechanization, high unit costs for factor inputs (e.g. seeds, stock acquired in small quantities), poor quality of infrastructure and lack of market access, small holdings fail to generate surpluses and to enter a positive cycle of savings and investment. Where small surpluses are produced, the bulk of value added is appropriated by intermediaries, processors, wholesalers and retailers. Furthermore, 60% of the rural areas are mono-functional, where the economy is characterised only by one or two sectors (e.g. mining, metallurgy, military production).

Limited resources available on the local level

Ukraine's taxation system is overly centralized, with most taxes accumulated by the central government and then redistributed to local governments. The majority of cities and districts rely heavily upon financial transfers from the state budget. In fact, up to 90% of village council budgets are made of transfers from the central government. Local budgets are formed mainly out of national fees and taxes, such as personal income tax which are fully regulated by the state. Other than land taxes, local governments have few opportunities to influence the total volume of revenues from taxes and fees. As a result, the share of local budget revenues is critically small and there is little interest among local governments to raise tax revenues across the board. The allocated public funds are not sufficient to finance all public services that should be available to citizens, as defined by the Constitution and Ukrainian law.

Deteriorating living standards in rural areas, declining social services infrastructure, and reduced access to social services

According to the State Statistics Committee (2009), only 30 % of households in rural areas have access to centralized water supply and sanitation, compared to 83 % of urban households. Hot water is available to 30% in rural areas compared to 88% of urban households; gas supply is

⁴ People whose share of daily consumption is below US\$ 5 (in PPP)

accessible by 50 % of rural households versus 84% of urban households. More than 20% of the boilers at community heating facilities have been in use for more than 20 years, of which 38% are obsolete and extremely inefficient. About 32% of the pipes in heating networks and 30% of heating facilities need replacement. Overall, the quality of services provided in rural areas remains poor and inefficient (e.g. heating is provided at a very high cost due to the wasted energy, and water leakage).

Inefficient use of energy

The amount of energy consumption of the Ukrainian households is 3-7 times higher than the average in Europe. One of the key reasons is that most of the equipment in use is obsolete as it has been installed during the soviet times without any requirements for energy-efficiency. Since energy costs now constitute more than half of all residential service costs, any increase in energy prices will lead to a significant increase in the cost of providing these services.

The central level policy and legal frameworks do not provide clear mandates, resources and division of responsibilities of local governments in the area of public service delivery

Despite their major role in allocating financial resources, local governments have only a limited ability to determine spending structure and reallocate expenditures within sectors. Local civil servants lack capacities in designing local development strategies, planning allocation of resources and reporting to local communities.

One of the fundamental reasons for the slow local self-governance development in Ukraine is the dominant role of the central government. The government authorities at all levels are not used to engaging the society in local decision-making processes. Furthermore, neither local authorities nor local communities are sensitised on the importance of involving other stakeholders such as private sector, civil society and media into local development processes.

Although some public participation mechanisms are already part of the legislation, they are not being applied fully. Consequently, most community members cannot exercise their right to participate in decision making, in particular in the process of debating local policy issues.

CBA I – Key findings and Lessons Learnt

Community Based Approach to Local Development (CBA) Project (Phase I – 2007-2011) aimed to address the problem of low public engagement into decision-making processes on the local level and to promote effective participatory local governance and decentralized management mechanisms in rural areas.

By August 2010, the CBA Project partnered with 24 regional authorities, the Government of Autonomous Republic of Crimea (ARC), 209 rayon authorities and 1136 village/city councils with the population of less than 10,000 people. It mobilized 1,165 communities which got organized into 1,154 community organisations (COs). With the support provided by the CBA Project, COs and local authorities undertook a joint planning process thus enabling the COs to undertake initiatives addressing basic needs in the area of energy, water supply, public health, environment and school transportation.

A total of 1,324 community projects were supported with the total amount of \$ 24 million cost-shared between COs (7.2%), CBA Project (46.4), local authorities (45%) and the private sector (1.4%). It is estimated that 1.1 million people benefited from these projects and 12,000 community members and 3,500 local/regional officials received training in subjects related to institutional development, financial management, participatory planning, community project management, participatory assessment, and decentralization.

According to various assessment studies⁵, despite the financial crisis and political instability, in less than 3 years the CBA Project succeeded in the following aspects:

- Improved cooperation between local authorities and citizens, and changed their attitude towards recognition of the benefits of participatory governance and community based local development. According to a survey⁶ conducted in 2010, the number of respondents who estimated as effective the interaction with local governments in CBA communities was 34% higher than average in Ukraine. Similarly, 91% of local experts indicated an increased consideration of communities' opinion in local decision making, and 41% of respondents in CBA communities indicated an increased level of trust in local governments.
- Improved health services, access to clean water, education facilities and waste management through renovation of 276 health-posts, 191 drinking water systems, school heating systems and the establishment of 14 waste disposal systems.
- Reduced energy costs by average 45% through the implementation of 773 projects on heating systems repair, windows insulation, roofs repair, and installation of energy efficient street lighting.
- Developed community based support structures (local development forums, regional coordination councils, community resource centers, and community organisations) as a platform to engage local authorities and citizens in dialogue on local development issues across Ukraine. These structures were strengthened to further scale up the application of the community based local development methodology.
- Improved skills of about 4,000 community representatives and local authorities in community led local development.

The interventions of the first phase of CBA demonstrated other benefits from active engagement of citizens in local development. These included: i) better understanding of citizens' needs and priorities by local governments and subsequent improvement in the targeted distribution of resources; ii) better understanding and appreciation by the citizens of the work and challenges faced by local governments; iii) more responsible attitude and sense of ownership towards public goods and public facilities; and iv) transparency of the decision making process and reduction of costs for the implementation and maintenance of public projects.

The CBA Project created a strong demand for continuation of the support provided both to the communities and local authorities in order to:

- Institutionalize participatory planning practices within the local structures funded with local resources;
- Engage more communities into the community mobilization processes;
- Create community demand to support small scale farm and non-farm economic initiatives;
- Apply a more systemic approach to energy efficiency with stronger linkages to regional and national strategies;
- Offer the community based approach methodology to academicians, civil servants and students through the development of training courses;
- Share the lessons learnt from the CBA project implementation with the national government and
- Develop a network of partner communities and address cross-cutting developmental issues like gender, good governance, energy efficiency, etc.

1.6.2. Relevance of the proposed action

The second phase of the CBA Project (CBA-II – 2011-2014) will build on the experience of CBA-I and other successful area-based development projects in different parts of Ukraine. Through the implementation of social mobilization techniques it will empower the citizens of villages and small towns to assert themselves as drivers of local development. The Project will also help the local authorities to recognize communities' role in fostering local development.

The CBA II Project includes:

- Expansion and replication of community based approaches;
- Building institutional capacity of local communities and local and regional authorities;
- Sharing best practices and lessons learnt among local/regional/national level governance structures; and
- Involvement of educational institutions to utilize the knowledge generated by CBA I.

The intended actions are consistent with the EU priorities for Ukraine. For example, **the National Indicative Programme (NIP)** for Ukraine for the year 2011-13 among others recognizes 'Sustainable Development' as one of the three priority areas for EU support to Ukraine. It aims to ensure the social and environmental viability of growth strategies. It includes the following sub-priorities which are also relevant for the CBA II project:

- Energy, Environment and Climate Change and Transport (improvement of energy efficiency in industrial, energy and agricultural sector).
- Social Cohesion: Regional and Rural Development (enhanced accessibility to public services, transport infrastructure, rural development, e-governance, telecommunications, sanitation, water supply, energy supply, etc.)

The **Eastern Partnership (EaP)** emphasises governance and energy security as priority and particularly stresses energy efficiency. The CBA II Project is also aligned with the priorities laid down in the **EU-Ukraine Association Agenda**, namely:

- Training of central and local administrations on new models of rural development policies for further implementation of programmes for rural communities;
- Exchange best practices on the renewal and preservation of natural resources to ensure efficient, sustainable and quality agricultural production

Lastly, CBA II complements other EU activities in the energy efficiency area on the national level, such as:

Sector Policy support programme: CBA-II will complement the Sector Support with small-scale actions to improve energy efficiency on the local level and enhance capacity development of local communities and local authorities in energy planning and efficient energy use supporting community-based self-help initiatives for the implementation of innovative projects.

Swedish Initiative on Energy Efficiency: The CBA-II actions and grants on a grass-root community level will also complement larger scale investment grants foreseen under the Swedish Initiative on Energy Efficiency to improve energy efficiency in district heating systems.

Donors coordination

The recent EC funded donor mapping study, which included the CBA I project, offers a clear overview of activities undertaken by international partners in the area of local development. The

study also recognizes CBA's comparative advantage (large geographic coverage) and its advanced methodology (participation of citizens and authorities) which reduces duplication and builds synergies with other donors. CBA II will continue taking into consideration ongoing activities of bilateral and multilateral donors to ensure complementarity, to share information, and to support partnerships among international donor organizations and the Ukrainian Government.

1.6.3. Target group/beneficiaries

The groups and entities that will be directly affected by the project are:

- The community organisations established/strengthened under the project, that carry out self-help initiatives with support from the Project, local authorities and other stakeholders;
- The local authorities in 200 rayons and in 900 communities (village and rayon councils) involved in developing an effective system of decentralised and participatory planning, decision-making and implementation mechanism for improved living conditions and relations with citizens.

The beneficiaries, who will indirectly benefit from the project activities in the long-term, are the citizens of the villages and small towns where community organisations will be established and self-help initiatives will be implemented;

The number of beneficiaries is calculated on the basis of analysis of the CBA I implementation modality and the following assumptions:

- Upper ceiling for the eligible amount of grant for one community micro-project funded under CBA II is 16,000 EUR compared to 7,000 EUR under CBA I.
- Project's share in the total cost of the community micro-project in CBA II will increase up to 70% of the total micro-project cost in comparison to 50% in CBA I.

1.6.4 Reasons for the selection of the community based approach. How does the Action contribute to the needs of the target group(s) and final beneficiaries?

The community-based approach has been chosen as the most appropriate approach to achieve the identified objectives because it ensures civic participation and co-operation not only between the members of the concerned communities but also between them and the local authorities.

Methodology of social mobilisation employs established standards and checklists for assessing community participation and leadership. It ensures the inclusion of all segments of the community (men, women, youth and the elderly) and the sustainability based on local ownership of the development process. The social mobilisation process is integral in developing everyday practices of democratic self-governance in rural areas. It is also a multi-stage process of building local knowledge and capacity needed to improve living conditions. Within the Project, each participating community will be guided through the following steps:

- Informing community members;
- Conducting community self-assessment;
- Creation of community organisations;
- Community development planning process;
- Project identification, prioritisation and implementation;
- Establishment of follow-up mechanisms (community progress review to enable community members to codify past achievements and build upon them; training and support to ensure the implementation of community development plans; promotion of a dialogue between community organisations and local authorities to align development priorities of individuals and communities with regional development planning).

The evolving fiscal decentralisation and establishment of democratic local governance in Ukraine provide opportunities and warrants new patterns of co-operation between communities, elected councils, rayon administrations, local CSOs and private business. An important element of the Project methodology therefore is to help these local actors to clearly identify the benefits and modalities of effective partnerships. Community mobilisation is only effective if it links communities with other public and private actors in the local and regional context. The community based approach will thus contribute to forging local partnerships.

1.7. Description of activities and key results

1.7.1. Details of Project's Activities

Activity 1- Launching of the CBA Phase II project

Activity 1.1 - Launching of the Project at the national level

A national conference is organized to present the experience, achievements and lessons learnt of CBA-I and the implementation modality of CBA II to key governmental stakeholders (relevant ministries, regional state administrations, and the Secretariat of the Cabinet of Ministers), local government associations, local civil society organizations, academia and international donor community.

Time frame: Month 1-2 of the Project implementation

Activity 1.2 - Launching of the Project at the regional level

Regional conferences are organized in each region presenting the experience of CBA-I on regional level and the implementation modality of CBA-II to regional authorities, rayon authorities and civil society organisations in the region. Focus is placed on: (a) implementation methodology, (b) roles and responsibilities of regional and rayon authorities, and (c) selection criteria for rayons.

The responsibilities of regional authorities as project partners include ensuring a firm commitment to provide free of charge office premises for the Project Regional Implementation Unit (RIU), nomination of a senior and a junior staff for coordination and functional support to the CBA II Project implementation, cost-sharing of micro-projects and willingness to replicate the CBA methodology. The required commitments ensure ownership and institutionalization of community based methodology in the region.

Timeframe: Month 2-3 of the Project implementation

Activity 1.3 - Establishment of the CBA II Project Management Unit

Availability of sufficient human resources has been recognized as the key to success of the CBA I Project. Competent human resources from CBA I are retained and vacant positions are filled through standard UNDP recruitment procedures.

Existing project management unit (PMU) in Kyiv and 25 regional implementation units are strengthened with necessary logistics and facilities for efficient implementation of the Project. Under the partnership agreement, regional authorities provide office premises for RIUs free of charge while operational (utility & minor repairs) costs are covered by the Project. Kyiv-RIU is located at the PMU premises.

The total number of envisaged project personal is 95 and additional short term international and national experts are hired for provision of specific technical support if needed. PMU consists of

12 programme and 8 support staff led by an international project manager during three years of project implementation. In order to support the development of national ownership, national project manager takes over the responsibilities of day-to-day management of the project for the last 17 months of project implementation. Three months overlap of duties of national and international project managers ensures proper project handover.

Each RIU has two community development officers and a driver. Detailed ToRs of Project personnel are provided below in Annex I.

Existing operational manuals/guidelines developed during CBA I are updated and new manuals/guidelines are developed to meet the requirements of CBA II. The newly recruited Project personnel receive training on CBA methodology at the beginning of the project implementation.

Timeframe: Month 2-6 of the Project implementation

Activity2 - Establishing partnership with local governments

Activity 2.1 - Partnership with regional governments

Memorandums of understanding (MoU) are signed with each regional administration/council. MOUs could be either tripartite (Regional State Administrations, Regional Councils, UNDP/CBA) or bilateral (Regional Councils-UNDP/CBA or Regional State Administrations-CBA/UNDP) (see Annex VII).

Timeframe: Month 3-4 of the Project implementation

Activity 2.2 - Rayon selection and establishment of partnership with rayon authorities

A call for participation of rayons in CBA II is announced in each region of Ukraine. The set of application documents includes:

- 1) Letter of commitment signed by the Head of Rayon State Administration/Head of Rayon Council.
- 2) Application form (see Annex X), which includes official statistical information reflecting the level of rayons' development in the project priority areas (health, environment, water management, local economic development, energy efficiency)

The selection of participating rayons is made on the basis of the following criteria: a) level of socio-economic development and access to public services (in line with priority support areas of the Project); commitment to provide financial resources (cost sharing for micro-projects implementation), commitment to provide technical support for micro-projects; and b) performance of the rayon during CBA-I (only for re-applying rayons). The preference is given to the least developed rayons i. e. rayons which are facing the most severe problems within the project priority areas. The level of commitment demonstrated to support project implementation is also taken into consideration for the final selection of rayons.

The number of partner rayons varies in each region depending on the size of the region, performance during CBA-I and commitment of the region to cooperate during CBA-II.

The applications of the rayons received from each region are analysed and ranked by the Rayon Selection Committee comprising of representatives of regional authorities, UNDP and the PMU and headed by the UNDP senior programme manager. Basis for the ranking is the statistical information provided by rayons in their applications. The committee selects the partner rayons (equal to number of quota for the region) and reserve rayons (up to one third of the quota for the region). Results of the rayon selection are publically announced by the regional authorities in each region.

Seminars are conducted jointly by the regional partners and CBA-personnel in each of the selected rayon presenting the experience of CBA-I and implementation modality of CBA-II. Among intended participants are the rayon authorities, village/city councils, civil society organisations and business communities. Focus is placed on the implementation methodology, terms of partnership with the rayon authorities and local councils, and selection criteria for village/city councils.

Following the seminar, a tripartite or bilateral MoU are signed between UNDP and rayon authorities (see Annex VIII).

Timeframe: Month 4-6 of the Project implementation

Activity 2.3 - Selection of village/city councils and establishment of partnership

In each partner rayon 5 village/city councils with less than 10,000 people are selected to participate in the CBA II Project. The allocated number includes the CBA I partner village/city councils, as well as the new ones.

Interested village councils provide information, reflecting its socio-economic situation and quality of public services (see Annex XI). The applications of the potential village/city councils received from each rayon (in the region) are analysed and ranked by the CBA/RIU based on such criteria as the level of socio-economic development and access to basic public services (in line with the project priority areas), commitment of the village/city council to cooperate and performance of the village/city council during CBA-I (in case of re-applying village/city councils only).

The preference is given to the least developed villages, i. e. villages which are facing the most severe problems within the project priority areas. The level of commitment demonstrated to support project implementation is also taken into consideration for the final selection of villages.

Upon review of the ranking by CBA/PMU, the list of partner councils is approved by the village/city councils selection committee comprising of representatives of regional authorities, rayon authorities and CBA/RIU. The committee is headed by a representative of the regional government. The results of the selection are announced in each rayon by the rayon authorities.

Village/city council orientation meeting is conducted in each selected village/city council jointly by the rayon authorities, CBA/RIU and regional authorities (where possible) and with participation of members of village/city council, representatives of communal service entities (school, health post, water supply, etc), CSOs, businesses and pro-active citizens in the village/city council. Focus is placed on the CBA implementation methodology, terms of partnership with village/city council and local communities, and the selection criteria for local community.

Following the seminar, a bilateral MoU is signed between UNDP and the village/city council. The responsibilities of the village/city council as project partners include: support to the CBA II implementation, provision of financial resources, i.e cost sharing for micro-projects (as possible) and ownership over the micro-projects assets as applicable.

Timeframe: Month 5-7 of the Project implementation

Activity 3: Formation/grafting of Local Development Forum and Regional Coordination Council

In order to introduce participatory decision-making practices at rayon, regional and ARC level support structures have to be developed. At the rayon level, a local development forum (LDF) serves as a platform for the dialogue between local communities and rayon authorities. At the

regional level and the ARC level, a regional coordination council (RCC) fulfills this function. (See Annex IX for the detailed description of LDF). It is expected that in the long run the functions of LDF and RCC will become part of the regular meetings of rayon and regional councils. In case of “new” rayons, LDF is formed under the head of rayon administrations/regional councils with the participation of COs, village/city councils, local CSOs, local businesses and key rayon departments as members. In “old” rayons, the existing LDFs continue their functions with the new COs and the new village/city councils as members. Similarly, existing regional coordination councils and the ARC level, coordination council continue functioning, while representatives of newly established LDFs join the activities of respective RCC.

Timeframe: Month 6-10 of the Project implementation

Activity 4: Establishing/strengthening of community resource centres

To ensure effective implementation of CBA II at the rayon level, rayon community resource centres are established (the already established resource centers within the CBA I partner rayons are used under CBA II). Similarly, the established RIUs and ARC-IU under CBA I are expanded to serve as community resource centres at the regional level and necessary technical support is provided.

Timeframe: Month 6-10 of the Project implementation

Activity5: Community mobilisation, capacity building and micro-projects implementation⁷

Activity 5.1 - Selection of the target communities

With the support of village/city council officials and local active persons, the RIU team prepares profile of village/city councils including description of communities located on the territory, as well as basic infrastructure and public service delivery problems faced by the communities within the CBA II priority areas of interventions. A ranking of communities in term of hardship is made. A community selection committee comprising of village/city council head, rayon focal person and Community Development Officer/CBA review the ranking of the communities and select one of the communities to be supported along with one in reserve.

Activity 5.2 - Introduction of CBA II Project and preparation of community profile

CBA Community Development Officers visit each selected community and provide information to the people regarding the CBA II project, distribute project brochures, collect basic demographic information, study the service delivery system, the resource endowment and the level of poverty in the community. Based on primary as well secondary information, the Community Development Officers/CBA prepare a community profile.

The Community Development Officers hold the first formal dialogue with the local community in order to motivate citizens to get organised and to introduce concrete steps to be followed in solving community development problems.

Activity 5.3 - Formation of community organisation (CO)

After the first dialogue, community members take some time to reach consensus on the matter described during the first dialogue. Upon reaching consensus, they form a community organisation in order to ensure a successful implementation of community initiatives. The establishment of a community organization requires:

⁷ Details on this section given in operational manual

- *Full participation:* 80% or more of the households are represented in the CO, without excluding low income households. In case of large settlements, participation will be ensured through formation of informal CO at street level and then forming an association of all informal COs;
- *Formation of CO-management team:* 3-9 pro-active members will be selected on a consensus basis to serve as a chairperson, a secretary, a treasurer and representatives of each street;
- *Gender balance:* At least 40% of the members and the CO-management team are female;
- *Accountability:* The CO-members are accountable for all the decisions made by the CO and the CO-management team is accountable to the CO General Assembly;
- *Commitment:* CO-members are ready to pay a membership fee, a community development fee and other fees as needed to carry out activities for improvement of the living conditions. The CO-management team is committed to serve the community for several years;
- *Transparency:* CO-members agree to meet regularly and take decisions and implement CO initiatives in a transparent manner.

Activity 5.4 - Training of CO-management team

RIU organises a series of training sessions for the CO-management team to strengthen capacity in managing the CO, promoting participatory governance, accounting and financial management, legalisation of the CO, etc. Study tours to successfully functioning COs are conducted in order to ensure knowledge sharing.

Activity 5.5 - Legalisation of the CO

The CO-management team conducts a series of consultations with the CO-members and prepares a draft statute. The CO approves the draft statute with consensus and endorses the CO-management team. CO sends a copy of the statute to Rayon Community Resource Centre (RCRC) and RIU for their record and presents itself with the village/city council. The CO registers as one of the following legal forms – Body of Self-organisation of population (BSP), NGO, Association of Co-owners of Multi-Apartment Buildings, or a cooperative. RIU provides necessary backstopping to facilitate the registration.

Activity 5.6 - Institutional building of the COs

COs belonging to one rayon or region may find it necessary to combine their strengths and form an association/federation. The purpose of such an association/federation could be experience exchange, mobilization of resources, raising common concerns, undertaking economic environmental activities of a larger scale. Although the rationale for establishing an association is clear, the sustainability is often very challenging. CBA II will strengthen the capacities of such associations/federations to support their sustainability.

Timeframe: Month 6-9 of the Project implementation

Activity 5.7 - Training of community members and local/regional authorities

A series of trainings/ study tours are organized for CO-members, officials of partner village/city councils, rayon authorities, regional authorities and the ARC Government. The training modules are tailored to the needs of existing and new partners and focused on such areas as decentralization, sustainable local development, community based approach, strategic planning, participatory planning process, innovative technology for energy saving, micro-project implementation, and sustainable service delivery.

Timeframe: Month 6-18 of the Project implementation

Activity 5.8 - Participatory planning in target communities

The RIU holds a dialogue in each CO to facilitate participatory planning and helps them to identify social/economic/environmental challenges faced by the community and the resource required for addressing the needs are estimated.

The household level planning is followed by participatory planning which is facilitated by the RIU and local authorities at CO level to enable the CO-members to identify community level needs. Often, a community development plan emerges based on the individual needs expressed by the majority of the members. Community development plans usually include local priorities for improvement of basic services/physical infrastructures of social (health posts, drinking water etc.), economic (e.g. , micro and small farm and non-farm enterprises) and environmental (e.g drainage/sewerage, window insulation, heating system, street lighting, waste disposal) nature.

Activity 5.9 - Prioritisation of needs

The list of needs identified at household level and community level are debated at the CO level to establish their intensity, technical/social/ economic/environmental feasibility, sustainability and equity and are then prioritised according to the level of their importance. The issue of utmost priority for the CO is selected for implementation.

Activity 5.10 - Selection of community plans to be implemented

RIU facilitates a planning workshop at a council level with the participation of local authorities, COs, local level development agencies, CSOs, CBA representatives, and representatives of the private sector. Community development plans of the COs and plans of other stakeholders on the territory of the council are presented, debated and approved. This workshop serves as a forum to match the demand and supply of resources to implement prioritised plans. Local authorities and COs indicate their commitment to provide resources for the implementation of the prioritised plans. In case the available resources cannot meet the financial needs for implementation of the local plans, the local authorities take a justifiable lead to present the community plans for discussion at the LDF and get them incorporated into a rayon /regional plan for adequate support in the future.

Aggregated social/economic/environmental plans of all COs are presented at one of the LDF meetings. Village/city councils and other agencies may also present their own individual plans during this meeting. The plans are reviewed and agreed upon during the meeting. The rayon authorities incorporate the approved plans in their own plan for current/next year funding.

Timeframe: Month 8-30 of the Project implementation

Activity 5.11- Development of detail proposal

A CO, with the help of personnel of technical departments of rayon state administrations, municipality, consultants and RIU, prepares a community project proposal following the requirements such as:

- The necessary technical analysis and design is done with the full involvement of the beneficiaries, and ensuring that **feasibility** (CO should be able to implement), **sustainability** (beneficiaries should be able to maintain), **equity** (at least 80% of the CO-members benefit and the low income households are not left out), **productivity** (the project directly or

indirectly contributes to increase in households income/reduction in households expenditure) and **environmental soundness** are fully met.

- The project budget is prepared only when the design is endorsed by the CO by consensus;
- Cash and in-kind community contributions are clearly stated and the additional support required from outside agencies is identified in the proposal;
- Operation, maintenance and sustainability mechanism is part of the proposal

With the technical documents in hand, the CO prepares a grant proposal. The developed proposals of community projects are agreed at the CO level with relevant local authorities.

Activity 5.12 - Mobilising resources

The developed proposals of community projects are reviewed and agreed upon at the meetings of local development forums. Technical departments approve the documents if they meet formal requirements. The village/city councils, rayon authorities, CO, businesses, CBA/RIU and others present in the local development forums meeting commit an amount that they could make available to expedite the proposed micro-project. Once the needed resources are mobilised, the local and rayon authorities issue a commitment letter of support to the CBA Project.

CBA offers resources (grants) to COs for the implementation of micro-projects subject to the following considerations:

- For innovative project for energy saving - up to 70% of the cost is contributed by CBA II, up to 30% by local budget and 5% by a beneficiary CO;
- For communal infrastructural projects related to health protection, water supply, general energy saving, environment (waste management, sewage and sanitation) improvement, – 50% of the costs is contributed by CBA, 45% by local budget and 5% by the CO;
- For CO, which benefited from the CBA project in the past the CBA II contribution is less than 50%;
- Grant limit for communal infrastructure micro-projects is up to US \$ 16,000 and for energy efficiency innovative projects will be up to US \$ 20,000;

Timeframe: Month 8-36 of the Project implementation

Activity 5.13 - Approval of micro-project proposals, grant provision and micro-project implementation

The micro-project proposals submitted by COs through RIUs are reviewed by civil engineers and other relevant specialists of CBA/PMU and appraised by the CBA II project selection committee. The micro projects that meet the formal criteria are submitted to UNDP for approval. The COs that received a grant funding under the CBA I project and wish to apply under CBA II will have to prove the existence of a maintenance mechanism for already completed micro-projects and will have to act as a demonstration site for the rest of the project communities.

Timeframe: Month 8-36 of the Project implementation

Activity 5.14 - Promoting local economic development

On a limited scale, CBA II supports small economic initiatives of rural communities. The main focus is on promotion of collective actions that could lead to income generation and employment creation. The Project will assist small farmers to organize and form cooperatives or other forms of collective non-farm small business and bring value-added to local products through

processing, packaging and shared marketing. The support will be provided to communities that successfully participated in CBA I or CBA II and are willing to start economic activities. The support may include training, advisory service, and provision of small grants for joint economic activities. An operational manual will be developed based on experience of CIDP detailing the selection of territory and target members, formation of cooperatives, capacity building, and implementation of economic activities. At least 5 oblasts will be selected with 2 rayons per oblast will be selected on a competitive basis.

Timeframe: Month 8-30 of the Project implementation

Activity 5.15 - Book keeping, monitoring and reporting

The CO management team maintains transparent books of all transactions (cash or kind) related to the micro-project implementation. It also presents the progress report to the CO on a regular basis. The CO conducts public audit upon completion of the works and reports to CBA II PMU for every tranche utilised by using the reporting template provided by the RIU.

Timeframe: Month 9-45 of the Project implementation

Activity 5.16 - Handover of completed micro-projects and ensuring sustainability

Completed micro-projects are handed over to the respective local structures (village/city councils, rayon departments) or to the COs (only when the legal structure allows them to own communal property, e.g. association of co-owners of a multi-apartments building, cooperative). To the extent possible, the Project encourages the legal owners to further manage and maintain the micro-projects.

Through a MoU, the local authority entrusts CO with operation and maintenance of the micro-project. CO explores options and makes a final arrangement for maintaining the micro-project. This can include community health funds for the regular maintenance of health posts, community-based enterprises for the management of water supply systems, and alike. A CO in the legal form of association of co-owners of multi-apartment building (ACMB) or cooperative is eligible to own, maintain and use communal properties.

Timeframe: Month 15-47 of the Project implementation

Activity 5.17 - Commissioning of micro-project and public clearance/auditing

Upon completion of a micro-project, the CO management team presents the final progress report to the CO General Assembly meeting. The CO audits the physical and financial transactions and the quantity and quality of the works done under the project. Upon finding it satisfactory, the CO grants public clearance for the project. The clearance is reflected in the minutes of the CO meeting signed by the CO members. A summary of the progress report is displayed to the public on information board. The CO submits the final progress report along with a copy of the public clearance to the CBA II PMU for its records.

The partner organisations (village/city councils, rayon state administrations, etc.) ensure that different micro-project components (e.g. pipes, taps, water reservoirs, water quality at source, housing structures, etc) satisfy standard technical specifications. Upon finding the result satisfactory, the project is handed over to the concerned authorities (or retained by the CO, if it is eligible) to incorporate in its inventory and make arrangement for operation and maintenance.

Timeframe: Month 15-47 of the Project implementation

Activity – 6: Promoting energy efficiency on the local level

Activity 6.1 - Revision of regional strategies on efficient use of energy

Regional authorities are supported in revision/updating of regional energy efficiency strategy. The technical/advisory support is provided on cost sharing basis and co-financing from regional budgets. Up-to-date strategy serves as a basis for more comprehensive support to communities with the view of further replication/scaling up of successful models of energy saving on the local level. It also provides an opportunity to move from the support to the stand-alone community initiatives towards a more holistic approach in increasing efficiency of energy use at the regional level.

Activity 6.2 - Developing recommendations to improve energy efficiency in public infrastructure and housing sector.

Technical recommendations are developed to enable local authorities and local population to reduce energy consumption in public buildings and housing sector, with particular focus on rural context.

Activity 6.3 - Support to the development of technical documentation for energy efficiency measures.

In line with regional energy efficiency strategies, project provides support to the development of the technical documentation for the selected energy efficiency projects of the large scale. It allows local authorities to apply for State Funds financing.

Activity 6.4 - Awareness raising campaign on efficient usage of energy

On the basis of the developed recommendations, public awareness campaign on specific measures to reduce energy consumption and to raise energy efficiency in the public infrastructure and housing sector for the local authorities and communities is launched. Campaign serves as a model for national replication.

Activity 6.5 - Support to community micro-projects in efficient use of energy (including projects on renewable energy production and energy saving)

This activity is implemented in all regions of Ukraine following the standard procedures of community mobilization (see Activities 5.1-5.16). Activities 6.1, 6.3 and 6.4 are implemented in four regions of Ukraine selected on the basis of the following: a) decision of the regional authorities to update a regional strategy on energy efficiency; b) allocation of regional or/and national resources for the implementation of the strategy; c) highest per capita emission of CO₂; and d) diverse geographical representativeness.

Timeframe: Month 8-47 of the Project implementation

Activity 7 - Knowledge sharing and establishment of knowledge management hub

Activity 7.1 - Establishment of Knowledge Management Hub

A knowledge management hub will be established initially at CBA/PMU and to be placed later within the Ukrainian Association of Local and Regional Authorities (UALRA). A Local Governance and Development Knowledge Network linking practitioners, professionals and policy makers in the field of participatory governance and community based development will be established under this national level Hub. The Hub will facilitate virtual and face-to-face knowledge sharing between community members, community organisations, local/rayon/regional and central authorities, development organisations, civil societies, academia,

donors, etc. Regional level knowledge hub will be established at the regional community resource centre or/at regional branches of UALRA. These regional hubs will provide the national hub with information received from the grassroots level. Information, post queries, solutions and good practices will be exchanged between the network members. Discussions will be moderated, compiled, summarised and shared with network members and also retained for institutional memory. The CBA II project provides technical and financial support for smooth functioning of the Knowledge Hub.

Activity 7.2 - Documentation of good practices and lessons learned

Collection of documents on community based approach is prepared and maintained as an e-library. Initial supply of such documents will come from UNDP-led projects namely CBA I, the Municipal Governance and Sustainable Development Programme, the Chernobyl Recovery and Development Programme and the Crimea Integration and Development Programme. Documents are also collected from projects of other donors' and national agencies in Ukraine that have experience in applying community participation approaches in local development. The Global Knowledge hub of UNDP will also be used.

Regional and national documentation is collected throughout the CBA-II implementation to further advance practical standards and relevant procedures for community based local development, e.g. co-funding mechanisms between community (citizens' resources), public authorities (state budget resources) and donors (development aid resources).

Activity 7.3 - Knowledge sharing

To the extent possible, experiences and good practices will be disseminated electronically and in hard copies to network members, non-member target groups, and other interested parties. Publications in local and national media and seminars/conferences will be carried out. Through organized visits, regional and national level media will be familiarised with community based methodology and its actual contribution to improving living condition of the people.

Timeframe: Month 10-48 of the Project implementation

Activity 8 - Building capacities of central and local project stakeholders

Activity 8.1- Internalization of CBA methodology

Due to strong demand from communities and local authorities for the implementation of community based methodology, technical support is provided to those regional/rayon authorities that would like to apply the community based development methodology outside the CBA-covered territories. The support includes technical advice and consultations for the development of appropriate mechanism including a 'local development fund', trainings, and small grants. The condition for the support is that project's contribution to the community initiatives supported through local fund mechanism is not higher than 20% of small grants cost.

Timeframe: Month 14-42 of the Project implementation

Activity 8.2 - Development of policy recommendation

Two national roundtables are organized during the CBA-II implementation to prepare policy recommendations on community based development approach in Ukraine. Special visits will be organised for parliamentarians, senior civil servants and policy makers.

Timeframe: Month 10-46 of the Project implementation

Activity 8.3 - Teaching students, training civil servants and elected authorities

In order to streamline the CBA methodology into the national and local level governance policies, the Project needs to invest in building the capacities of civil servants working in the area of local and regional development. Equipping the graduate students with theoretical and practical aspect of decentralised local development and community led participation is also among the aims of the CBA II project. Support will be provided for conducting trainings and seminars, study tours, roundtables for universities and training institutes, and publications and technical/advisory support for curriculum development.

Timeframe: Month 6-46 of the Project implementation

Activity 9 - Conducting information campaign and raising public awareness on crosscutting issues

To ensure visibility of EU and UNDP, communication activities will be carried out under the framework of the ‘joint visibility guidelines for EC-UNDP actions in the field’. The visibility and communications strategy, developed and applied during the CBA I project, will be re-visited and updated. Communication materials will be produced and disseminated among stakeholders at all level. Donors, media and partners will be provided with up to date information on project activities through periodic progress reports and newsletters. The CBA project website will be maintained to give partners an easy access to resource materials and information on the project activities. Additionally, information campaign will be undertaken to raise community awareness on cross-cutting issues like gender, climate change, and good governance.

Timeframe: Month 1-48 of the Project implementation

1.7.2. Expected results

The key results expected through the implementation of the proposed project are:

- 900 community organizations, 200 Local Development Forums and 25 Regional Coordination Councils created/strengthened to ensure appropriate platform for collective actions and joint decision-making at local level⁸
- The capacity of 200 community resource centres in community-based development strengthened
- The curriculum on community led development including the community-based development principles and methodology adopted by at least two regional universities/training centres
- At least 6,000 community members and 2,000 elected/state authorities trained on how to cooperate with community organisations and local authorities
- At least 600 community micro-projects implemented to improve the delivery of basic communal services and to support economic development in rural areas At least 10,000 members of community organizations trained on energy efficiency to ensure increased public awareness at local level on energy saving options
- At least 300 community projects on energy saving/renewable sources of energy supported to reduce energy loss and diversify energy sources.

⁸ Number of beneficiaries was estimated on the basis of the following assumptions:

- Increased upper ceiling for the eligible cost for one community micro-project in CBA II (up to 16 000 EURO in comparison to 7 000 EURO in CBA I)
- Increased project’s share in the total cost of the community micro-project in CBA II (up to 70% of the total micro-project cost in comparison to 50% in CBA I)
-

1.8. Methodology

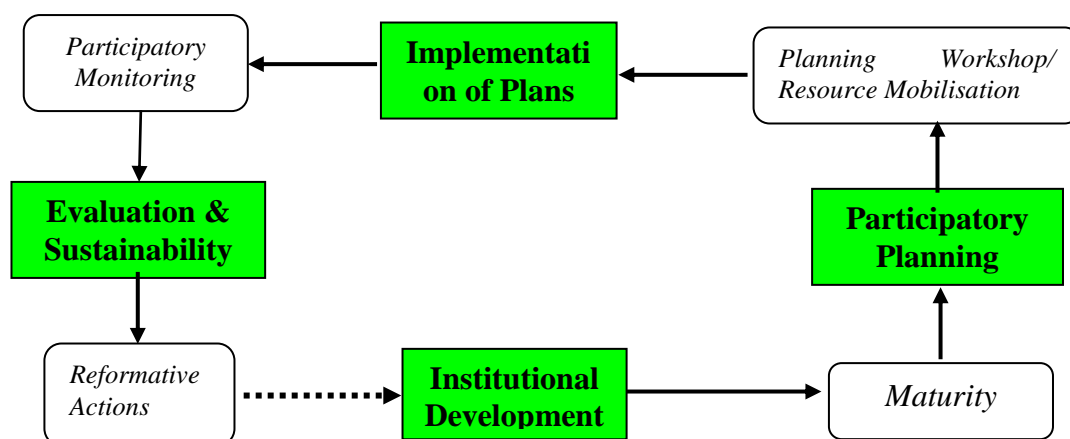

1.8.1. Method of implementation and reasons for choosing proposed methodology

Social mobilisation is a dynamic process which harnesses the people's potential for self-help initiatives. The underlying assumption is that people are willing and have potential to do many things themselves for their own wellbeing, their families and their community. They often need social/technical guidance in order to get motivated and organized. Such guidance includes help to:

- Identify genuine activists from among themselves;
- Identify and prioritise what people are willing to undertake in terms of opportunities and needs;
- Undertake a feasibility study of identified opportunities and needs in light of peoples' capacity, equity, sustainability and availability of resources from within and outside;
- Arrange, secure and facilitate the flow of required resources to the community, and
- Monitor, lobby, and establish linkages between communities, local authorities, CSOs, private sector and donors.

The above actions are accomplished in 4 stages: institutional development; bottom-up planning; implementation of plans; and operations/maintenance (flow chart – I). Each stage promotes/strengthens governance in one way or the other.

Flow-Chart – 1: Stages of Community Mobilisation Cycle

Central to the Project implementation strategy is the “Community-Based Approach” which applies bottom-up, participatory planning and community mobilisation process in order to encourage the formation of self-governing community organisations which undertake self-help initiatives in partnership with local authorities. Most commonly, the self-help initiatives include renovation of basic social and communal infrastructure and provision of better public service delivery with the ultimate goal to improve living conditions. The implementation of community led initiatives results in a critical mass of practical experiences of participatory local governance and improved relations between local authorities and citizens thus providing inputs for the

ongoing debate on administrative and fiscal decentralisation and further democratisation of society.

The CBA II project will be implemented by the United Nations Development Programme in Ukraine under the framework of a contribution agreement signed between EU and UNDP, following the procedures of the 'Joint Management with International Organization' and the Financial and Administrative Framework Agreement between the European Community and the United Nations. UNDP Ukraine will implement the CBA II project by utilising its established capacity and experience obtained in community-based approach development interventions.

The Project will be implemented through Direct Implementation Modality in accordance with the UNDP 'Programme and Operations Policy and Procedure' (POPP), the UNDP office in Ukraine will be responsible for project implementation, including for: provision of expertise in all areas related to the project, organising implementation of project activities, recruitment of project personnel and consultants, and contracting services for the procurement of equipment. UNDP Ukraine will build on its previous experience with relevant governmental and non-governmental partners and will tap into its global knowledge networks to mobilise complementary international expertise in order to achieve optimal results.

Tenders for procurement of equipment will follow the UNDP procurement rules according to Art. 6.1 of the Financial and Administrative Framework Agreement between the European Community and the United Nations.

UNDP Ukraine will closely cooperate with and inform the Delegation of European Union to Ukraine at all stages of project implementation. All reports will be submitted in hard copy and in electronic version.

Regular coordination and review meetings between UNDP and the EU Delegation will be conducted to monitor the project's progress and agree upon on the major issues related to the CBA project implementation.

The main project partner will be the Secretariat of Cabinet of Ministers. The Steering Committee of CBA I will be maintained with its further expansion as necessary. The Project Steering Committee provides advice and guidance on project implementation. The CBA II Project Manager is in charge of the daily management of the project and facilitates a proper functioning of the Steering Committee. Terms of Reference (ToR) of the Steering Committee is provided in Annex II.

1.8.2. Extension of previous actions

The proposed action is an extension of CBA I and therefore, it builds upon the work carried out by CBA I in terms of utilising the manuals/guidelines, services of project staff, established partnerships and the lessons learned.

1.8.3. Procedures for follow up and internal/external evaluation

The Action will be subject to standard monitoring and evaluation procedures of UNDP. Evaluation of the project implementation will be commissioned by EU. Project monitoring and evaluation will be based on periodic assessment of progress on delivery of specified project results and achievement of project objectives. Using the internal monitoring system developed during CBA I, quarterly reports will be produced by the Project focused on analysis of progress against planned activities. Annual reports will be drafted and submitted to UNDP and EU no later than two months following the end of year. These reports will contain an in-depth analysis of the results and outcomes achieved during the year. In addition, annual presentations to present the Project key deliverables to the Steering Committee will be carried out.

1.8.4. Audit

The project shall be subject exclusively to the internal and external auditing procedures laid down in the Financial Regulations, Rules and Directives of UNDP. A copy of the audited financial statements of UNDP issued by its external auditors shall be submitted to the European Union by UNDP.

1.8.5. The role and participation in the action of various actors (local partner, target groups, local authorities, etc.)

At Central Level, the main focal agency for the project will be the Secretariat of the Cabinet of Ministers of Ukraine. As the main counterpart of the project, it will:

- Coordinate and facilitate the involvement and participation of line ministries and other relevant government agencies;
- Ensure that regional and local authorities are duly informed about the project and fully authorised to participate; and
- Provide recommendations and support for project implementation

At Regional Level, the main counterparts are the regional state administrations and Regional Councils (in case of ARC, the Office of the Chairperson of the Council of Ministers of the ARC.) They will:

- Facilitate the function of the Regional Implementation Unit and its expansion into a resource centre;
- Provide office space for RIU/resource centre;
- Appoint regional state administration staff to join CBA team in project implementation and to coordinate with oblast/local authorities;
- Facilitate the work of project regional coordination council;
- Assist in the selection of target rayons and village/city councils;
- Review and integrate rayon development plans (based on community development plans) into the regional development plans; and
- Make available budgetary resources to the extent possible

At Rayon Level, the main counterparts are the rayon state administrations and rayon councils. They will:

- Appoint focal persons for working closely with the RIU/oblast focal persons;
- Assist in the selection of village/city councils and target communities;
- Establish and chair the Local Development Forum (LDF) and represent LDF in regional coordination council and coordinate with oblast authorities for effective implementation of the project;
- Establish a rayon community resource centre/ and maintain the existing rayon community resource centre to support CBA as well as non-CBA communities;
- Integrate community development plans approved at LDF into the rayon development plan;
- Provide technical expertise and other support to COs in designing of community led micro-projects;
- Allocate resources for community initiatives approved by local development forum;
- Support implementation of community projects by observing tenders and by participating in the supervision of micro-project implementation;
- Facilitate hand over and support establishment of sustainability mechanisms for completed micro-projects

At Local Level, the main partners are local authorities (village/city councils). They will, among other:

- Support RIU in establishing and strengthening self-governing COs;

- Review community development plans, recommend approved plans at local development forum meetings;
- Participate in the design and implementation of micro-projects and mobilise internal resources;
- Participate in the design and establishment of effective sustainability mechanisms for completed sub-projects;
- Coordinate with rayon authorities for effective implementation of CBA activities

At Community Level, the selected target communities are the main partners at community level. They, among other:

- Form and maintain an inclusive self-governing CO founded on the principles of good governance;
- Select active persons and CO-MT to carry out the functions of COs;
- Prepare community development plans and debate/approve them at local level planning workshops;
- Contribute in cash/kind to maintain the CO and implement micro-projects;
- Serve as a watch-dog to ensure accountability of CO-management team and the CO-members;
- Support sustainability of micro-projects and the services derived from them.

1.8.6 Team proposed for the implementation of the action

The CBA-II will maintain two levels of project teams set up during CBA-I to carry out the functions as follows:

At Central Level the current project management unit (PMU) tasks will be:

- Overall management of Project implementation;
- Coordination with stakeholders and project partners;
- Strategic, technical and methodological backstopping to Regional Implementation Units;
- Final endorsement of community projects for grant award;
- Monitoring of project implementation and quality assurance; and
- Knowledge management, reporting and visibility

The PMU will consist of:

- International Project Manager (to provide leadership and overall management support) – for the three years of project implementation;
- National Project Manager – for the last 17 months of project implementation;
- 2 Community Development Specialists (to supervise project implementation in up to 13 regions each);
- 4 Engineers (each one support community project related activities in up to 7 regions each);
- Cooperative/Small Business Development Officer;
- Energy and Environment Specialist;
- Monitoring and Communications Specialist;
- Administration Officer;
- Finance Specialist;
- 8 project assistants (4 finance, 2 community development, 1 monitoring, 1 administration); and
- Driver

At Regional Level the main tasks of the RIU will be:

- Overall management of field component of the Project;
- Community mobilization;

- Creation/strengthening of support structures at rayon/regional level;
- Creation/strengthening of community resource centres;
- Human resource development at local/rayon/regional level;
- Establishment/continuation of bottom-up participatory planning process;
- Implementation and sustainability of community projects; and
- Experienced documentation, dissemination and visibility

In each region, the CBA II project will have up to three project staff (2 community development officers and 1 driver). Selection and recruitment of project staff (see Annex - I for TOR of staff members) will be done by UNDP in framework of its standard policy and procedures.

1.9. Main means proposed for implementation of the action

- Office premises, office furniture and equipment for PMU and 25 RIUs. Furniture and equipment of CBAI will be utilised during CBAII as well. Replacement or addition will be made as necessary to ensure effective implementation.
- 1 vehicle for the PMU and 1 vehicle for each RIU. Current vehicles will be checked for their suitability for CBA-II period and replacement will be made for those which will prove unsuitable. The rejected vehicles will be disposed

1.10. Duration and indicative action plan for implementing the action

The duration of the action will be 48 months.

Activity #	Key Activity	Year - 1												Responsible Body
		Semester 1						Semester 2						
		1	2	3	4	5	6	7	8	9	10	11	12	
1	Launch of CBA Phase II Project													UNDP, EU, CBA Team
2	Establishment of partnerships on local level													UNDP, CBA Team
3	Formation/grafting of local support structures: local development forums, regional coordination councils. Establishing/strengthening community resource centres													CBA/OIU, RSA/RC, OSA/OC
4	Community mobilization , capacity building and micro-projects implementation													RSA/RC, CBA/OIU
5	Promotion of energy efficiency on local level													COs, local authorities, CBA Team, UNDP
6	Promotion of farm and non-farm micro and small business development													COs, local authorities, CBA Team, UNDP
8	Establishment of knowledge management hub													CBA Team
10	Building capacities of local stakeholders (community members, civil servants and													CBA Team, academia

authorities are expected to replicate the CBA-methodology in additional territories using the support structures in place.

Institutional aspect (Will structures allowing the activities to continue be in place at the end of the action? Will there be local "ownership" of action outcomes?)

The Regional Implementation Units are established in each region of Ukraine with an understanding that the RIUs will be converted into Regional Community Resource Centre. The focal person from the regional government, the operational guidelines and project documentation will provide institutional memory to continue the functioning of the centre. The established Regional Coordination Councils and the linkages with the network members under the Knowledge Management Hub will further support the continuity of resource centres.

The rayon resource centres established by rayon authorities and managed by the focal person (delegated) from the regional state administration will continue functioning at the cost of rayon and will keep supporting local communities. The logistical support (furniture, equipment) provided by the Project to the resource centres will become property of the regional state administrations/councils allocated to the resource centres.

The establishment of inclusive self-governing community organisations, local development forums, oblast coordination councils and Resource Centres will provide an institutional framework and platform at the grass-roots level. These structures will facilitate and further expand participatory planning, decision-making and implementation of activities addressing local development needs and priorities, as well as promote improved dialogue and effective partnerships between local authorities and citizens, even after CBA II ends. Moreover, community leaders who were involved in CBA projects are increasingly elected into the village/rayon councils, thereby replicating the bottom-up community-based approach in the system of public administration and civil society.

Furthermore, the introduction of CBA methodology into university curricula and development of training modules for civil servants and elected authorities will contribute to building capacity in participatory governance and community based approach to local development. This will also contribute to continuity of methodology implementation after the project ends.

Policy level where applicable (What structural impact will the action have - e.g. will it lead to improved legislation, codes of conduct, methods, etc?)

The Project will help to create practical experiences in participatory local governance that can subsequently contribute to on-going debates and reforms on administrative and fiscal decentralisation and lead to further democratisation of society.

As mentioned in Section 1.7 under Activity 10, during the entire process of project implementation, good practices and lessons learned will be documented and discussed at the local development forums for sharing information and knowledge among all stakeholders. These policy recommendations will be further analysed and compiled by the Local Governance and Development Knowledge Network – the Hub (section – 8) and brought to the attention of policy makers.

1.12. Logical framework

The Logical Framework for the Project is presented in Annex-IV.

BUDGET FOR THE ACTION

Annex-V (A) of this document details the Project's operational and activity costs.

EXPECTED SOURCES OF FUNDING

Annex-V (B) indicates the expected Sources of Funding of the Action.

Annex - I
Terms of Reference of CBA II Staff

1) International Project Manager (PM)

The Project Manager shall be responsible for the overall management of CBA project activities, developing and implementing a results-based work plan for the project. He/she shall be responsible for all substantive, managerial and financial reports from the project. He/she will provide overall supervision for all CBA staff in field stations and in the project management unit in Kyiv as well as guiding and supervising all policy-based relations between the project and the Government of Ukraine. The Project Manager will have the following specific duties:

Policy Analysis and Advisory Services:

- Monitor and analyze key economic, social and political developments in the country which affect regional / local or national development; through this process, identify development needs and potential solutions relevant to project activities;
- Analyze Ukrainian policy in the area of local / community development. Identify challenges and recommend policy changes that will facilitate community development and expansion of the model of effective cooperation between local citizens and authorities.
- Contribute to policy dialogue on the issues of communities engagement in the decision-making process on the local level with the Government, donors, civil society, private sector.
- Create platforms for dialogue at regional (oblast) and district (rayon) level, between local authorities and community organizations. Support creation of local development forums and provide assistance to their functioning.
- Advocate, promote awareness and understanding of local sustainable development issues in the context of MDGs, climate change and European integration processes.
- Engage with senior government officials at the national, regional and local level to promote expansion of community-based development programming.
- Establish and maintain dialogue with government officials, both local and national, NGOs, partners, donors and communities to provide knowledge and understanding, ensuring accurate interpretation of the program's mission;
- Engage with senior EU and UN officials to demonstrate effectiveness of technical assistance to local communities in Ukraine.
- Lead and effectively manage the CBA project team comprising of up to 90 individuals. Ensure proper training, guidance and coaching opportunities for all CBA personnel and local leaders assisted by the project.

Programme Services:

- Manage the CBA project financial and human resources
- Create systems for effective financial, administrative and logistical processes to facilitate community-level work
- Ensure proper operational, financial and administrative management in the project, as well as adherence to all UNDP rules and procedures;

Local Development Forum (LDF)

A Local Development Forum (LDF) is set up at the Rayon State Administrations to facilitate dialogue, coordination, planning and decision-making at local level between the oblast and rayon authorities and communities for promoting integration and development.

CBA, through the CRC, provides technical assistance to the LDFs and functions as its secretariat. Rayon State Administration provides office space for CRC and for meeting of the Forum. Normally, the meeting of LDF is held once in every two months.

Objectives of establishing the LDF are –

- (1) To promote social, environmental and economic development at local level through participatory consensus-based planning and decision-making and a more effective allocation of financial resources,
- (2) To promote decentralized planning and democratic governance at regional level, and

Tasks of the LDF are to –

- (1) Review Community and Village/city Council Development Plans and synchronize these plans with regional and sector plans and strategies;
- (2) Determine financial and technical resources available at community, village council and oblast level to support community development initiatives;
- (3) Prepare plans for mobilizing technical and financial resources in support of community development initiatives from relevant national and international organizations;
- (4) Coordinate for community development initiatives and post-implementation management and maintenance between communities, oblast state administration, village/city councils, technical departments and other actors involved (i.e. local NGOs, banks, national and international funding organizations, etc.);
- (5) Resolve bottlenecks in implementation of community development initiatives, including provision of necessary permits and approvals from relevant technical departments and other structures in the oblast for design and construction works and for future technical and financial management and maintenance of facilities;
- (6) Discuss relevant issues and topics related to sustainable social and economic development of the oblast and agree on plans and actions to address these issues, if required;
- (7) Share information on new laws and policies relevant to communities, social and economic development, etc;

MEMBERS OF THE LDF INCLUDE –

V. General Provisions

5.1 The **RECIPIENT INSTITUTION** shall carry out all activities described in its Workplan with due diligence and efficiency. Subject to the express terms of this Agreement, it is understood that the **RECIPIENT INSTITUTION** shall have exclusive control over the administration and implementation of the activities referred to above in paragraph 1.1 and that UNDP shall not interfere in the exercise of such control. However, both the qualities of work and the progress being made toward successfully achieving the goals of such activities shall be subject to review by the Steering Committee. If at any time the Steering Committee is not satisfied with the quality of work or the progress being made toward achieving such goals, the Steering Committee may advise UNDP to: (i) withhold payment of funds until in its opinion the situation has been corrected; or (ii) declare this Agreement terminated by written notice to the **RECIPIENT INSTITUTION** as described in paragraph 5.7 below; and/or seek any other remedy as may be necessary. The Steering Committee's determination as to the quality of work being performed and the progress being made toward such goals shall be final and shall be binding and conclusive upon the **RECIPIENT INSTITUTION** insofar as further payments are concerned.

5.2 UNDP undertakes no responsibilities in

V. Загальні положення

5.1 **УСТАНОВА-ОДЕРЖУВАЧ** виконує всі заходи, викладені в її Плані робіт із належною дбайливістю та ефективністю. Згідно з прямо вираженими умовами цієї Угоди передбачається, що **УСТАНОВА-ОДЕРЖУВАЧ** має виключний контроль над адмініструванням та впровадженням заходів, зазначених у п. 1.1, і що ПРООН не втручаються у здійснення такого контролю. Проте, як обсяг роботи, так і прогрес в успішному досягненні цілей таких заходів підлягають перевірці Керівним комітетом. Якщо в будь-який час Керівний комітет не буде задоволений якістю роботи або прогресом у досягненні цих цілей, то Керівний комітет може порекомендувати ПРООН: (i) утриматися від виплати коштів доти, доти його думка про ситуацію не зміниться на кращу; або (ii) оголосити цю Угоду припиненою шляхом направлення **УСТАНОВІ-ОДЕРЖУВАЧУ** письмового повідомлення, як зазначено нижче у п. 5.7; та (або) звернутися до будь-яких інших заходів залежно від необхідності. Рішення Керівного комітету щодо якості виконуваної роботи та прогресу в досягненні таких цілей є остаточним і обов'язковим для виконання **УСТАНОВОЮ-ОДЕРЖУВАЧЕМ** тією мірою, що стосується подальших платежів.

5.2 ПРООН не несуть відповідальності щодо

respect of life, health, accident, travel or any other insurance coverage for any person which may be necessary or desirable for the purpose of this Agreement or for any personnel undertaking activities under this Agreement. Such responsibilities shall be borne by the **RECIPIENT INSTITUTION**.

5.3 The rights and obligations of the **RECIPIENT INSTITUTION** are limited to the terms and conditions of this Agreement. Accordingly, the **RECIPIENT INSTITUTION** and personnel performing services on its behalf shall not be entitled to any benefit, payment, compensation or entitlement except as expressly provided in this Agreement.

5.4 The **RECIPIENT INSTITUTION** shall be solely liable for claims by third parties arising from the **RECIPIENT INSTITUTION**'s acts or omissions in the course of performing this Agreement and under no circumstances shall UNDP be held liable for such claims by third parties.

5.5 Assets (Equipment) supplied by UNDP funds to the **RECIPIENT INSTITUTION** shall be the property of UNDP until the end of the project, at which time UNDP shall determine the best use of these assets. In cases where the **RECIPIENT INSTITUTION** has met its responsibilities under this agreement, and handover of the asset would contribute to the sustainability of activities, UNDP would normally handover these assets to the **RECIPIENT INSTITUTION**. The assets shall be used for the purpose indicated in the Workplan throughout the period of this Agreement.

5.6 This Agreement may be terminated by either party before completion of the Agreement by giving thirty (30) days written notice to the other party, and the **RECIPIENT INSTITUTION** shall promptly return any unutilized funds to UNDP as per paragraph 5.6 above.

5.7 The **RECIPIENT INSTITUTION** acknowledges that the Implementing Partner and UNDP and its representatives have made no actual or implied promise of funding except for the amounts specified by this particular tranches Agreement. Although project related documents may indicate a total amount of funds that could be available for this **RECIPIENT INSTITUTION**, actual disbursements will be based upon the **RECIPIENT INSTITUTION** meeting performance targets. If any of the funds are returned to the Implementing Partner and UNDP or if this Agreement is rescinded, the **RECIPIENT INSTITUTION** acknowledges that the Implementing

страхового покриття за страхуванням життя, здоров'я, страхуванням від нещасних випадків, страхуванням транспорту або будь-якого іншого страхового покриття для будь-якої особи, що може бути необхідним або бажаним для цілей цієї Угоди, або для будь-якого персоналу, котрий виконує діяльність за цією Угодою. Таку відповідальність несе **УСТАНОВА-ОДЕРЖУВАЧ**.

5.3 Права і обов'язки **УСТАНОВИ ОДЕРЖУВАЧА** обмежені умовами та положеннями цієї Угоди. Відповідним чином, **УСТАНОВА-ОДЕРЖУВАЧ** і персонал, що надає послуги від її імені, не мають права на жодні пільги, платежі, компенсації чи допомогу, крім тих, що прямо зазначені у цій Угоді.

5.4 **УСТАНОВА-ОДЕРЖУВАЧ** несе одноосібну відповідальність по вимогах третіх сторін, що впливають із дій чи бездіяльності **УСТАНОВИ-ОДЕРЖУВАЧА** у ході виконання цієї Угоди, і за жодних обставин Виконавчий партнер та ПРООН не несуть відповідальності по таких вимогах третіх сторін.

5.5 Активи (обладнання), поставлені за рахунок коштів ПРООН **УСТАНОВИ-ОДЕРЖУВАЧУ**, є власністю ПРООН до закінчення проекту, після чого ПРООН визначає найкращий спосіб використання цих активів. У випадках, де **УСТАНОВА-ОДЕРЖУВАЧ** виконала свої обов'язки за цією Угодою, а передача активу сприяла б сталості діяльності, ПРООН, як правило, передає ці активи **УСТАНОВИ-ОДЕРЖУВАЧУ**. Ці активи використовуються в цілях, зазначених у Плані робіт, протягом усього терміну дії цієї Угоди.

5.6 Дія цієї Угоди може бути припинена будь-якою зі сторін до її закінчення, для чого відповідна сторона направляє іншій стороні письмове повідомлення за 30 (тридцять) днів, і **УСТАНОВА-ОДЕРЖУВАЧ** негайно повертає ПРООН усі невикористані кошти відповідно до п. 5.6.

5.7 **УСТАНОВА-ОДЕРЖУВАЧ** підтверджує, що ПРООН та її представники не робили фактичних або припущених пропозицій фінансування, крім як щодо сум, зазначених у даній конкретній Угоді стосовно траншів. Хоча у документах щодо проекту може бути зазначена загальна сума коштів, котрі могли б бути надані даній **УСТАНОВИ-ОДЕРЖУВАЧУ**, фактичне виділення коштів залежатиме від досягнення **УСТАНОВОЮ-ОДЕРЖУВАЧЕМ** планових показників. Якщо будь-які кошти повертаються ПРООН або якщо ця Угода скасовується, то **УСТАНОВА-ОДЕРЖУВАЧ** визнає, ПРООН не

Partner and UNDP will have no further obligation to the **RECIPIENT INSTITUTION** as a result of such return or rescission.

5.8 No modification of or change to this Agreement, waiver of any of its provisions or additional contractual provisions shall be valid or enforceable unless previously approved in writing by the parties to this Agreement or their duly authorized representatives in the form of an amendment to this Agreement duly signed by the parties hereto.

5.9 Any controversy or claim arising out of, or in accordance with this Agreement or any breach thereof, shall unless it is settled by direct negotiation, be settled in accordance with the UNCITRAL Arbitration Rules as at present in force. Where, in the course of such direct negotiation referred to above, the parties wish to seek an amicable settlement of such dispute, controversy or claim by conciliation, the conciliation shall take place in accordance with the UNCITRAL Conciliation Rules as at present in force.

The parties shall be bound by any arbitration award rendered as a result of such arbitration as the final adjudication of any such controversy or claim.

5.10 Nothing in or relating to this Agreement shall be deemed a waiver of any privileges and immunities of the United Nations, or UNDP.

IN WITNESS WHEREOF, the undersigned, duly appointed representatives of the Implementing Partner, and the **RECIPIENT INSTITUTION**, respectively, have on behalf of the Implementing Partner and the **RECIPIENT INSTITUTION** signed the present Memorandum of Agreement on the dates indicated below their respective signatures.

матимуть жодних подальших зобов'язань перед **УСТАНОВОЮ-ОДЕРЖУВАЧЕМ** в результаті такого повернення чи скасування.

5.8 Жодна модифікація чи зміна цієї Угоди, відмова від будь-якого з її положень або додаткові договірні положення не мають чинності або позовної сили, якщо вони не були попередньо затверджені у письмовому вигляді сторонами цієї Угоди або їхніми належним чином уповноваженими представниками у формі поправки до цієї Угоди, належним чином підписаної її сторонами.

5.9 Усі суперечки та претензії, що впливають із цієї Угоди або з її порушення чи виникають згідно з цією Угодою, вирішуються шляхом прямих переговорів, а у випадку невдачі останніх урегульовуються згідно з Арбітражним регламентом ЮНСИТРАЛ, чинним на даний момент. Якщо в ході вищезазначених прямих переговорів сторони бажають полюбовно врегулювати такий спір, суперечку чи претензію шляхом примирення, то таке примирення здійснюється згідно з Арбітражним регламентом ЮНСИТРАЛ, чинним на даний момент.

Будь-яке арбітражне рішення, винесене в результаті такого арбітражу, є обов'язковим для виконання сторонами як остаточна ухвала за такою суперечкою чи претензією.

5.10 Ніщо в цій Угоді або пов'язане з нею не вважається відмовою від будь-яких привілеїв та імунітетів ООН або ПРООН.

НА ПОСВІДЧЕННЯ ЧОГО нижчепідписані, належним чином призначені представники відповідно **ПРООН** та **УСТАНОВИ-ОДЕРЖУВАЧА**, підписали цей Меморандум про Угоду у дати, вказані під їхніми відповідними підписами.
